## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1711

1. Claims 1-8, 17-21, and 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear from the claim language if or when 1,4-butanediol is a required or optional component. According to claim 1, the alicyclic diol is used in an amount of 0.5 to 10 weight percent of the composition; therefore, at 5 to 10 weight percent of the combined butanediol and alicyclic diol quantity, it would seem that butanediol is excluded; however, this is unclear.

Furthermore, if or when 1,4-butanediol is a required component, then it is unclear how to determine the relative amounts of butanediol and alicyclic diol that are to be used.

Lastly, applicants have failed to set forth a basis for the combined butanediol and alicyclic diol quantity. Is the quantity based on the weight of the composition?

2. Claims 1-8, 17-21, and 23-25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants have failed to provide adequate description with respect to whether 1,4-butanediol is a required or optional component. Furthermore, applicants have failed to set forth criteria for determining the relative amounts of butanediol and alicyclic diol to be used. In an effort to resolve the issues set forth within paragraph 1, the examiner has reviewed the specification; however, the specification is unclear

with respect to how the quantities of butanediol and araliphatic diol are to be determined or controlled within the invention.
